

INTERNSHIP OPPORTUNITY AT BIOTECH STARTUP

MAY 2019

An innovative biotech startup is looking for a strong business-minded student to join their team for a 6-week internship and support the startup's fundraising process over the summer. It is a great opportunity for any young student who wants to initiate a career in VC or startups.

Company description

Spiden is a biotechnology startup located in Pfäffikon, Schwyz, aiming to develop a blood implant to measure blood KPIs in real-time. Its mission is to bring state-of-the-art technologies from research institutions and R&D companies to industrial, medical and consumer applications. Further information is given by request due to sensitive data.

The internship opportunity

Spiden is incubated by LG Capital, a Swiss venture capital and startup incubator. The internship is an unpaid work experience with all relevant expenses covered. Start date to be determined case by case. The intern's responsibilities will be:

- Work closely with LG Capital's core team during the fundraising process, making the bridge between R&D and business demands.
- Support the making of the Spiden's investor pitchdeck, helping to communicate their technology's strengths in concrete business terms and market advantages.
- Continue to constantly iterate the investor presentation, adjusting to market feedback in order to create a bulletproof presentation.

Students who are interested in this opportunity can apply directly by sending an email to Vivian Rothberg, Associate at LG Capital, at vr@lg-cap.com. Please submit your application by May 27th.
